We offer you an assessment that revolves around your business present and future needs within data storage. At the same time we would like share with you how we successfully lowered the cost for data storage by as much as 50% for our existing Swedish and international partners.

Our analysis is based on ten years of extensive experience in demanding storage solutions. We offer the you the strategic details to maximise your current investments, as well as future needs.

The analysis is based on four simple steps:

1. Project initiation.
2. Execution.
3. Design solution.
4. Presentation and hand-over assessment.

At the end the project we present our results in a workshop, and discuss the suggested improvements. The analysis is no form a binding partnership, and costs are only presented should you wish to implement suggested changes.

Welcome to ELITS - another kind of IT.

The main purpose of this analysis is:

- Provide an overview of existing storage solution.
- Potential flaws in the system.
- Technical report on infrastructure, with recommendations .
- Suggestion of service design for the future.

Always included:

- Consultant on-prem for three hours.
- Workshop for handover and discussion .
- Assessment that shift ownership at end of project.

We deliver

- A detailed report that covers both a strategic and technical perspective of existing storage solution, and future needs.
- Cost estimate on implementation on suggested changes .
- Estimate on possible cost save, and time frame, for suggested design solution.

We help you!

We analyse how to increase performance in your existing storage solution, provide cost efficiency, and how to build for the future.

ELITS is a global provider of IT operations and infrastructure solutions. Since the start in 2006 we have grown in a steady pace, together with our customers. We provide 24/7 service through our locations in Europe, North America and Asia. But we are pretty far from your average, IT corporation stereotype. We are the anti-thesis to corporate hierarchies, strictly contract-driven business and short-term revenue focus.

We are something different. We are - and provide - Another kind of IT
